## Important information LWS 02 LightWorm

### Technical details:

Power supply: 110-240 V / 50-60 Hz

Bulb socket: E27

Protection class: II

Maximum wattage (thermal):

60 W

Supplied bulb:

bulb with mirror-coated dome, 40 W

#### Note:

This specified maximum wattage applies to conventional bulbs. Since these have however been off the market since 01.09.2009, we recommend energy-saving bulbs with about 1/5 of the specified wattage.

**Halogen bulbs are not suitable** because these become much hotter than conventional bulbs.

### Safety instructions:

- Never cover the luminaire with a cloth – fire hazard!
- Always ensure that the plug is removed from the socket before working on the luminaire or changing the bulb.
- Have repair work performed only by an authorized electrician, because electrical power can cause severe injuries!
- Some of the lamp components may get very hot in operation! Avoid skin contact with these components to prevent burns.
  
- Please do not bend the flexible tube beyond its minimum radius of bend of approx. 5 centimeters.
  
- When you have bent the luminaire into the desired shape it may, in the course of time, sag. This leads to the possibility of the hot bulb getting too close to inflammable materials. Please, therefore, see to it that the bulb is at least 15 centimetres away from surrounding objects. Do keep objects which are inflammable or can melt or change colour under heat in a safe distance from the bulb.

### Care of lamp:

For cleaning the painted and nickel-plated lamp parts only use a damp micro fibre cloth.
