

The LC8 stool takes its inspiration from the swivel chair designed in 1927 by Charlotte Perriand for her own apartment in the Place SaintSulpice in Paris, and was shown at the 1929 Salon d'Automne, as part of a collection co-designed with Le Corbusier and Pierre Jeanneret. Its iconic and versatile shape derives from the need to rationalise serial production by using common elements. The trivalent chrome-plated steel frame, available both in a polished or painted finish, features polyester padding and expanded CFC-free polyurethane foam, and is upholstered in leather or fabric. Also available as an outdoor version with a frame in stainless steel finished in powder paints designed for outdoor use in a range of five textured colours, the stool has been awarded Catas certification thanks to the updates to the structure made by Cassina in 2016.

Designer

Le Corbusier, Pierre Jeanneret, Charlotte Perriand

In 1922, Le Corbusier began working in the new rue de Sèvres, Paris, atelier with his cousin Pierre Jeanneret with whom he shared research projects and design criteria in a profound and life-long professional relationship.

In October 1927, the pair decided to draw on the contribution of a young architect who had already begun to establish a reputation on the architectural scene of the time: Charlotte Perriand.

Their collaboration lasted through to 1937 and was extremely fruitful, especially in the field of furniture design. The partnership was highly significant, both in terms of the cultural weight of their achievements and their professional successes.

It was together with Charlotte Perriand that the pair tackled the innovative project for "l'équipement d'intérieur de l'habitation".

The resulting designs were of great intellectual value and considerable commercial success.

Thanks to Cassina's ongoing production, there is continued interest in the conceptual contents of the work and the level of quality attained.

Due to these characteristics, each item in the collection is eagerly awaited.
