

Corniches

Ronan & Erwan Bouroullec, 2012

Corniches arose from the need for small impromptu storage spaces for miscellaneous items. 'The same way that we hang our belongings on a rock jutting from a cliff before diving into the sea, we need small, informal storage in everyday life too', explains Ronan Bouroullec. And this is the reason that Corniches are neither regular shelves nor simple horizontal surfaces, but rather individual, isolated protrusions in the environments that we create.

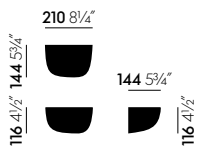

Whether as a key rack beside the front door, a spot to put everything we need to have at our fingertips in the bathroom, a display surface for a small collection of objects or as a large installation, Corniches are a new way to use the walls in our living spaces.

They are produced from high-quality plastic in a variety of shapes, sizes and colours

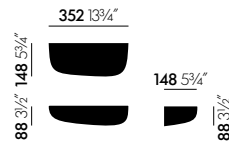

Materials

- **Shell:** ASA plastic, high-gloss surface.
- **Wall bracket:** polyamide.
